

Haylou GT1 2022 manual

Gently insert the handset into ear canal, set the handset to most comfortable wearing condition.

When making a call, set the microphone towards mouth for a better speaking experience.

Turn on

1. Remove the headphones from the docking station.
2. If the headphones do not turn on automatically, press the multi-function button for 1.5 seconds

Shutdown

1. The headphones will automatically turn off when you put them into the docking station
2. Outside the docking station, press the multi-function button for 4.5 seconds

Pairing

Take out both earphones from the charging case at the same time, open the Bluetooth on the device and search for "Haylou GT1 2022", finally click it to complete the connection. Put the headphones back into the charging case and repeat the above operation if the connection fails. After the first connection, the headphones can be

automatically connected to the last paired device (Bluetooth must be turned on)

Manual connection:when the headphones are off, manually turn them both on. Wait 2-3 seconds for them to turn on and connect to each other. Turn on the Bluetooth device to connect when the light on one earbud slowly flashes white.

Switching between mono and stereo mode:After successfully connecting two headphones, it is stereo mode. Put one back in the case to turn it off, the other goes into mono mode. Or take it out again and restore stereo mode.

Function

Short press of the multifunction button - play / pause music

Double-press the multi-function button on the left earpiece – play the previous song

Double-press the multi-function button on the right ear-bud – play the next song

Double-press the multi-function button – answer / end the call

Triple press of the multifunction button on the left earpiece - activate the voice assistant

Triple press of the multifunction button on the right earpiece - turn on / off the low latency mode

When there is a new incoming call during a call

1. Hold the previous call and answer the second call: double touch
2. Hold the previous call and reject the second call: Hold the multi-function button for about 1.5 seconds
3. Switch two calls: double touch

Factory settings

1. Put both earphones into the charging case and make sure the case has enough power.
2. Clear the phone's pairing record, turn off Bluetooth, and complete the connection again

Common problems

1. One of the earphones is muted - Try to put the muted earphone into the charging case and then take it out; If the problem is not resolved even after the above operation, try the reset steps:
2. The handset cannot be charged - Check whether the charging case is sufficiently charged; Wipe the charging contact with a dry cloth or cotton swab
3. The earphones cannot automatically disconnect from the mobile phone - Check whether the charging case is sufficiently charged. The handset will not turn off if the case is not powered and disconnected from the mobile phone.
